

THE ANTARCTICAN SOCIETY

Notice

The Antarctic Society is happy to announce the second meeting of the 1962-63 season to be held in the lecture room of the National Academy of Sciences, 2101 Constitution Avenue, on Thursday evening February 14 at 8:00 p.m.

The program for the evening will feature an illustrated discussion of atmospheric physics with the general title The Atmosphere and Beyond, covering such important aspects of the subject as sun-earth relationships, solar particles, cosmic rays, configuration of the magnetic field, and the causes for conjugate points, auroras, ionospheric phenomena, and whistlers. The speakers will be Dr. Martin A. Pomerantz, Director of The Bartol Research Foundation and Chairman of the U.S. Committee for the International Year of the Quiet Sun, and Dr. T. Neil Davis, Resident Research Associate at the Goddard Space Flight Center.

The meeting will be open to the public. Members are urged to pass the word among interested persons and to bring guests.

Many requests have been received for a current roster of members. It is hoped to prepare such a document during March of this year. Members who are in arrears at that time will not be included. If you are one who through some oversight has neglected to pay his dues that fact will be noted below. Please make out checks to Fred G. Alberts and mail them to him at the Office of Geography, Department of the Interior, Washington 25, D. C.

Henry M. Dater  
Secretary
